SPACE VALUES & ETHICS

Improving the performance of 400 SMEs in only 3 years is possible thanks to our ambitious objectives, our agility and our innovations. We act on the scale of an entire industry

Our results-oriented culture is reflected in the success of our collective projects (PI1, PI2, PIDF and many others...). Our know-how and talents are at the service of industrial performance and operational excellence.

Our pragmatism, integrity and neutrality give us a mutual trust with our associate and executive members, our consultants and trainers. It is through to this trust that we are able to support the transformation of the aeronautical supply chain by responding to the challenges of both suppliers and major industry players.

AERO EXCELLENCE™ PRINCIPLES

- 1 **A universal language** for industrial maturity in the sector
- 2 **A unique process** for qualifying evaluators
- 3 **Mutual recognition** of evaluation results by customers

AERO EXCELLENCE™ SPACE MISSIONS

AeroExcellence Missions

1. Monitor and validate Assessors qualification
2. Manage Assessment Mutualization
3. Animate National assessor's pool
4. IS platform operation and first support
5. Coordinate Grid & processes changes proposition
